

Risk Matrices							
	Negligible	Minor	Major	Hazardous	Catastrophic		
Very Unlikely	Low	Low	Low Medium	Medium	Medium		
Unlikely	Low	Low Medium	Low Medium	Medium	Medium High		
Moderate	Low	Low Medium	Medium	Medium High	Medium High		
Likely	Low	Low Medium	Medium	Medium High	High		
Very Likely	Low medium	Medium	Medium High	High	High		
	Risk	Statement	Response	Objective	Likelihood	Impact	Risk Level
	Loss of code through unforeseen circumstances.	Writing and saving code to one workspace increases the risk of loss due to unforeseen circumstances (e.g Power outage)	Regularly saving and pushing code to the cloud (in this case, github) throughout the day and at scheduled intervals.	To ensure that code is preserved throughout all stages of creation.	Very Unlikely	Catastrophic	
	Eye Strain	Focusing on a screen for hours at a time could cause eye strain.	Ensure that regular breaks are taken away from screens.	To preserve my eyesight for the future.	Moderate	Minor	
	Power Outage	Working exclusively within development environments relies on stable electrical power to provided to the machines being used.	Saving and pushing code regularly, ensuring that all electircals are tested and maintained.	To ensure that workflow is maintained and there are minimal losses to productivity.	Low	Minor	

	Loss of internet connection	Utilising software that is hosted on the internet means that there will be some reliance on having a stable internet connection.	Minimising the use of these tools, and ensuring that all information is backed-up with local copies.	Having multiple copies of all of the deliverables for the project in its entirety.	Low	Low	
	Productivity losses due to unstructured time.	Having to structure my own time and workload relies on being disciplined.	Making sure that my time for this production week is structured as far as possible for myself, utilising the project management tools that we have learnt throughout the bootcamp.	Making sure that work is acknowledged and that any threats during the time are identified and minimised in a dynamic way using SMART goals and reflections after each day (as well as at the point of submission)	Likely	Catastrophic
